

Mahr | Dimensional Metrology

Optimal machinery to suit your production environment

The first of its kind from Mahr: the Cylindrical Coordinate Measuring Machine (CCMM) Mar4D PLQ 4200. State of the art multi-sensor technology, the Mar4D PLQ 4200 inspects rotationally symmetrical workpieces more flexibly and conveniently than ever before. It offers maximum speed and precision for fast and reliable measurement results – including ergonomic operation and comprehensive safety features.
