

Mahr | Millimes 2000 W(i) & 2001 W(i)

The new generation of electronic comparators

Set new standards in metrology – with comparators from Mahr. With the linearized inductive measuring system, measurements are more precise than ever – regardless of whether static or dynamic measuring tasks are involved. Combined with the incomparably user-friendly touch user interface, **Integrated Wireless** connectivity and the full-surface glass display, you experience practical and reliable operation combined with the highest precision.
